There is a large class of young men and old who, while they want to be well dressed, do not want to pay extravagant prices for clothing just because they bear the name of some well advertised maker. It is for this ciass of men that "ECONOMY" Clothing is made. The real value is put in each garment, the best materials, the most skilled workmen, and the finest designers are employed to produce clothing that can be guaranteed to hold its color, hold its shape, wear long and look neat, stylish and dressy so long as there is a piece of it. After this the price is made just as low as possible. There is no charge for the name, no charge for reputation, but the value is put in the clothing.
